I'm sorry to bother you with this, but can you give me a short instruction on how to make the game work? This is my first time dealing with a PKG file game. Of course, I can't copy the file in my FAT32 USB (with a 4GB size limit), so I can't copy the file in the HDD PS3. I tried to extract the PKG file and now got its contents, I copied that in my USB, but it didn't work in the PS3 either. I admit that the extracted data lack several files that I usually find in other ISO games I downloaded from here (i.e. folder LICDIR) Please help. Sengoku Basara 4 SchumeragiThanks advance!
